PROPOSAL FOR ALTERNATE DISTRIBUTION POINT

Mary Immaculate Hospital has expressed interest in an alternate distribution point for Chick-fil-A, Yoder Plaza to be established at their facility. This ADP would be in a location that has more than _____ patients, faculty and visitors on a daily basis. In addition, companies such as Ferguson North American Headquarters, as well as countless small businesses, would have access to this ADP.

We are proposing a limited menu that would focus on lunch day-part. The Chick-fil-A standards of taste and quality will be upheld as the distance between the food preparation site and the ADP is only 3.5 miles.

Below is a proposed list of items that we wish to serve as well as a price point for each item. In addition, we have proposed a layout that would have a POS tent, condiment station as well as seating for several guests.
